Statement on the Relocation of General Iron

When I took office I pledged to do everything in my power to facilitate a relocation or shutdown of General Iron.

The recent news of their impending move from Lincoln Park marks the final phase of these efforts.

However, I will not be satisfied with a drawn-out relocation process. With the North Branch modernization and environmental issues in mind, this transition should be expedited to accommodate for the future of the area.

I will continue my push to ensure that long-awaited improvements to this community are delivered safely and swiftly.
